RevTek Solutions

Q | What is a Ransomware attack is and why it is important for businesses – whatever their size – to protect themselves from these types of attacks?

A | Ransomware attack is when a cybercriminal hacks into your network, by means of a phishing email or through vulnerabilities in your network – with the goal of holding your company's data hostage for ransom.

We live in a world where hackers are lurking, hiding, and plotting attacks in every major cloud storage service, server, hard drive, application, and cell phone.

Cybercriminals today are huge operations with hundreds of foreign and domestic chaos creators who have one goal: to bring the free world to its knees through disruption, financial ruin, and embarrassment.

No company is immune to cybercrime. According to the 2021 MSP Cybersecurity Threat Report, most companies infected with ransomware were also running up-to-date endpoint data protection.

Companies and industries of all sizes are at risk, which is why it's important, now more than ever, to protect your company's data, your client's data, your employees' data, and your critical programmes and transactions.

This is the new cyber battlefield.

Q | What if I already have a cybersecurity solution in place, why would I need RevTek's Blockchain solution?

A | RevTek's Blockchain Solution is your last line of defence against a cyber attack and works seamlessly with any existing backup procedures and virtually any hardware and software combination, without the need to replace or eliminate any part of your current data security or backup systems.

It's the part of your cybersecurity suite that has been missing....until now.

RevTek Solutions

Q | RevTek Solutions is a company that offers a solution to protect businesses from Ransomware can you give us a little bit of background on the Company?

A | Headquartered in Collingwood, Ontario (Canada) and Leesburg, Virginia (USA), RevTek Solutions operates with a unique blend of systems engineers and information technology experts.

The team has first-hand experience operating with several key government agencies, including the Department of Veterans Affairs, the Department of Defense, the US Air Force and Homeland Security. Experiences include working with agency IT organizations and various lines of government businesses from Veterans' benefits and healthcare, to supporting the warfighter in combat, and customs and border patrol.
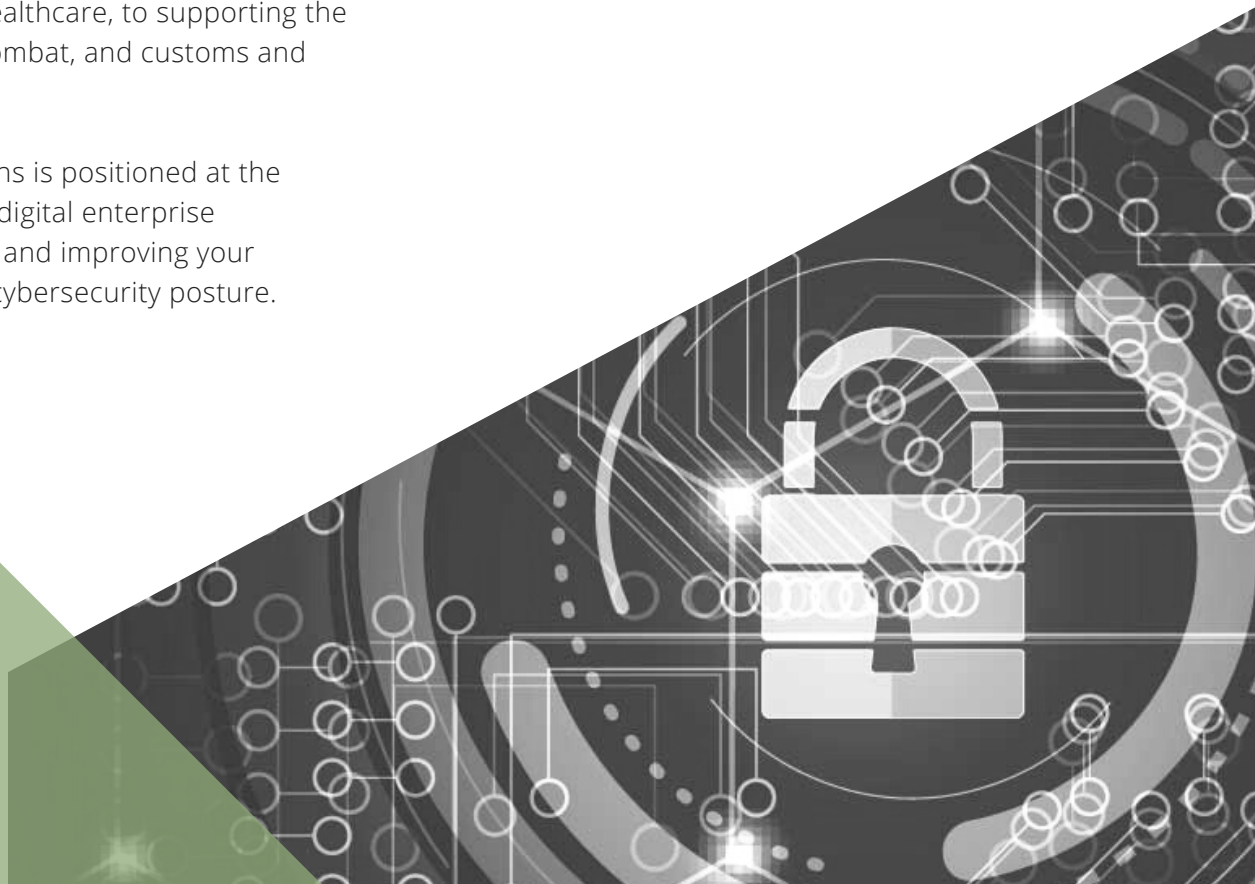

RevTek solutions is positioned at the intersection of digital enterprise transformation and improving your organization's cybersecurity posture.

Q | What does RevTek Solutions have to offer and what are the benefits for businesses?

A | Revtek Solutions Canada is offering a turnkey Blockchain Solution, that can seamlessly integrate into your existing data backup infrastructure – allowing quick recovery after a Ransomware attack.

The benefit of our secure data archiving system is that you no longer need to be concerned with data recovery because your data will always be in a perfect and uncorrupted state.

If cybersecurity were a tightrope, we are your safety net.

RevTek Solutions

Q | How does RevTek Solutions work and how does it protect a company's data?

A | RevTek's Blockchain Solution archives a company's critical data, allowing for quick recovery after a ransomware attack and should be considered as a key feature of any companies' cybersecurity incident response plan. Quick recovery means less downtime, which means a company will see a reduction in lost income due to an attack.

By harnessing the power of blockchain, your data is shred and scattered across thousands of servers, making it virtually impossible for any hacker to reassemble your data.

 In fact, your data doesn't physically exist until you recall it, making RevTek's Blockchain Solution one of the most secure methods of protecting your data.

We exist to ensure you should never have to pay a ransom by safeguarding an immutable and uncorrupted copy of your data.

Q | Technology always seems to be expensive. What kind of pricing or offers does RevTek Solutions have in place for the Canadian market?

A | Revtek's Blockchain Solution packages are economical and begins at 39.95/month USD for 100GB of space and allows for up to 3000 GB.

To put this into perspective:
100 GB = 650,000 document pages | 25,000 photos | 50 hours of HD video.

As your company's critical information grows, we grow with you.
